2

25X1A

1. ☐ Comment. As compared with the last reported period, the total loading performance decreased slightly, except for 30 December 1952, where it exceeded a total of 30,000 cars for the first time. The number of cars loaded for the Soviet occupation forces corresponded to the relatively low figures reported for last winter.

25X1A

2. ☐ Comment. These data supplement information contained in a previous report and in paragraph 1 of the present report, and break down the number of cars loaded for the Soviets and loaded with coal according to the eight railroad districts.
